#### **FACILITY OVERVIEW**

Hamilton County Public Health records for this landfill are limited. Therefore, the extent and exact location of disposal is unknown. In September 2005 a Rule 13 request was submitted to "delineate the volume and extent" of the waste in preparation for development of a subdivision. The request indicates that the fill area is approximately a 2.1-acre ravine. The disposed material is described as an off-spec foam core from Monsanto mixed with onsite soil. In October of 2005 Ohio EPA issued a notice of deficiencies for the request however, no response was ever submitted. Review of ODOT aerials (Figures 3.3.4-A through C) from the 1960's shows the area mostly undisturbed in 1960 with some disturbance evident in 1964 and 1969.
